

### **Environmental Policy Statement**

The Directors and management of AliMet Fabrications Limited recognise that the business activities of the company can have an impact on the local, regional and global environment.

It is our aim to reduce these environmental impacts and to operate in an environmentally responsible manner.

This policy therefore describes how we intend to achieve this aim.

In carrying out this environmental policy, we will strive to achieve, and will also encourage others to achieve, the following objectives:

1. To work towards operating an environmental management system (EMS) throughout the company.
2. To take an integrated view of the environment and to adopt a long-term perspective, both concerning the well-being of the environment itself and the effects of human actions upon it.
3. To meet, and where appropriate exceed, all relevant environmental legislative and regulatory requirements together with requirements imposed by customers and other relevant parties.
4. To review and monitor all our business activities and operations in order to identify, understand and evaluate their direct and indirect environmental aspects and effects, and prioritise actions to address these issues.
5. To support continuous environmental improvement by establishing demanding, achievable and measurable environmental performance targets that will be reviewed and reported on an annual basis.
6. To reduce energy and resource consumption by utilising effective and efficient working methods, processes and practices consistent with best practice.
7. To implement a systematic waste minimisation programme in order to achieve objectives and targets for reducing waste, avoiding the use of terminal waste treatment and dealing with it, as far as possible, at source.
8. To minimise the environmental effects of the handling, transportation and subsequent treatment of any residual waste generated by the company.
9. To avoid the use of toxic materials in business operations, services and products.
10. To prevent, minimise or render harmless releases of pollutants arising from business operations and services.
11. To prevent community impacts associated with noise or vibration from our business activities.
12. To encourage modes of transport, which minimise environmental impact, ensure that our employees are aware of efficient driving and examine the operation of our vehicles.
13. To maintain effective communication systems on environmental matters to ensure that our employees are aware of relevant environmental issues, and of their own roles and responsibilities in delivering the overall programme and providing training for those with particular responsibilities.

14. To integrate environmental management into training programmes and job descriptions for all employees.

15. To keep abreast of relevant technical and legislative developments in order to continue operating in accordance with current best practice.

16. To promote the company's objectives and to respond positively to enquiries and suggestions from both inside and outside the company.

17. To select and work with corporate partners, suppliers and contractors to improve their environmental performance towards achieving compliance with this policy.

18. To ensure that key suppliers and contractors are aware of our policy and as far as practicable to ensure that goods and services procured support the environmental policy and that wherever possible, they operate to similar standards.

19. To regularly monitor, audit and review our environmental programme to ensure continuous improvement, and identify examples of best practice that may be shared throughout the company.

20. To carry out regular reviews of management practices to verify their validity and effectiveness in achieving the company's environmental objectives.

21. To collate and publish relevant information about our environmental performance on an annual basis.
